# Index — Volume 5

## Article Index

### March 1991

#### Papers

**Membranes**

Facilitated transport of carbon monoxide: A review
*G.S. Patil, S. Baruah and N.N. Dutta* 2-8

Comparison of performance of PSA and membrane systems for $N_2$ production
*Douglas M. Ruthven* 9-10

**Thermodynamics**

Temperature effect on diffusion of carbon dioxide through upper layers of Yucca Mountain
*Tevfik Bardakci* 11-15

**Adsorption**

Adsorption of very low level carbon dioxide impurities in oxygen on a 13X molecular sieve
*F.W. Giacobbe* 16-20

**Purification**

Thermal swing adsorption process for removing trace impurities from a multi-component gas mixture: (landfill gas)
*R. Kumar and T.C. Golden* 21-24

**Separation**

Moderate-pressure cryogenic air separation process
*Harry Cheung* 25-28

**Theory/Modelling**

Solubility of acid gases in chemical and mixed solvents
*Tjoon Tow Teng and Alan E. Mather* 29-34

Multi-component adsorption of ethane, n-butane and n-pentane in activated carbon
*D.D. Do, X. Hu and P.L.J. Mayfield* 35-48

Modelling of sorption of gaseous sorbates in bidispersed structured solids. The concept of heterogeneity of the microphase
*S.K. Bhatia, P.G. Gray and D.D. Do* 49-55

### June 1991

#### GAS Separation International Papers - I

Gas distribution in large-diameter packed columns
*Ž. Olujić, F. Stoter and J. de Graauw* 59-66

Sorption of $N_2$, $CH_4$ and $CO_2$ in Silicalite-1
*L.V.C. Rees, P. Bruckner and J. Hampson* 67-76

On intraparticle total pressure change during gas phase adsorption
*S.E. Scholl and A.B. Mersmann* 77-82

Developments in air separation
*R.M. Thorogood* 83-94

A model of acid gas absorption/stripping using methyldiethanolamine with added acid
*T.R. Carey, J.E. Hermes and G.T. Rochelle* 95-110

Options available in the Solinox vent gas purification process
*M.P. Heisel and A.E. Belloni* 111-114

Simulated pressurization of adsorption beds
*A.E. Rodrigues, J.M. Loureiro and M.D. LeVan* 115-124

Gas separation by pulsed pressure swing adsorption
*J. Hart and W.J. Thomas* 125-133

### September 1991

#### Papers

Efficient cryogenic nitrogen generators: An exergy analysis
*R. Agrawal and D.W. Woodward* 139-150

A pressure swing membrane separation process
*Y.K. Kao, Zhiquan Yan, Li Li and Hanqing Fan* 151-160

Investigation of phase equilibria in multicomponent mixtures consisting of propane, carbon dioxide, water and various organic solvents. Part I: Experimental methods, equipment and procedures; results with test systems consisting of $CO_2$, $C_3H_8$ and $CH_3OH$
*F. Schroedter, W.-M. Melzer and H. Knapp* 161-172

Separation of $CO$-$CO_2$-$N_2$ gas mixture for high-purity CO by pressure swing adsorption
*Li-qun Zhu, Jin-ling Tu and Ya-jun Shi* 173-176

Design of packed towers for absorption and desorption of carbon dioxide using hot promoted $K_2CO_3$ solution
*D. Phaneswara Rao* 177-180

Dynamic behaviour of a semibatch non-isothermal gas-liquid reactor
*D. Phaneswara Rao* 181-186

Study of adsorption of 1-octen 3-ol on porous hydrophobic polymers
*J.A. Rojas, A. Voilley and C. Thomas* 187-193

### December 1991

#### GAS Separation International Papers - II

Production of medium pressure nitrogen by cryogenic air separation
*R. Agrawal and R.M. Thorogood* 203-209

Methods for incorporating adsorbent activity into zeolitic adsorption isotherms
*D. Pan and A.B. Mersmann* 210-214

Characterization of asymmetric poly-sulphone membranes for gas separation
*J. Marchese and C.L. Pagliero* 215-221

Plasticization of gas separation membranes
*M. Wessling, S. Schoeman, Th. van der Boomgaard and C.A. Smolders* 222-228

Optimization of ethane extraction plants from natural gas containing carbon dioxide
*L. Fernandez, J.A. Bandoni, A.M. Eliceche and E.A. Brignole* 229-234

Experimental investigation and mathematical modelling of the purge step in pressure swing adsorption
*G. Kluge, G. Nagel, G. Böhm and R. Schöllner* 235-241

High purity CO gas separation by pressure swing adsorption
*F. Kasuya and T. Tsuji* 242-246

Adsorptive purification of large waste gas streams
*N. Pechler and G. Emig* 247-251

Gas permeability of polyphosphazene membranes
*E. Drioli, S.-M. Zhang, A. Basile, G. Golemme, S.N. Gaeta and H.-C. Zhang* 252-258

$SO_2$ removal from flue gas with dry limestone
*G. Krammer and G. Staudinger* 259-260

Preparation of supported thin palladium-silver alloy membranes and their characteristics for hydrogen separation
*E. Kikuchi and S. Uemiya* 261-266

Gas separation through a high-flux asymmetric polymer membrane metallized with palladium
*P.-V. Mercea and V. Mecea* 267-272

## Subject Index

Absorption 181
Acid gas removal 29, 95, 161
Activated carbon 35, 49, 125, 173, 187, 235, 247
Adsorption 16, 21, 35, 49, 67, 77, 83, 115, 125, 173, 177, 187, 210, 242, 247
Air separation 25, 83, 203
Aroma compounds 187
Ash 259

Carbon dioxide 11, 16, 29, 95, 125, 173, 177, 229, 235
Carbon monoxide 2, 242, 252
Cellulose acetate 267
Cryogenics 25, 83, 139, 203

Diffusivity 11, 35, 151
Distillation 25, 59
Dusty gas model 77

Ethane 229
Exergy analysis 139

Gas distribution 59
Gas-liquid reactor 181

Hydrogen 261
Hydrogen sulphide 29, 95, 247
Hydrophobic polymers 187

Isotherm models 67, 210

Landfill gases 21
Limestone 259

Membrane 2, 9, 83, 151, 215, 222, 252, 261, 267
Molecular sieve 16

Natural gas 161, 229
Nitrogen production 9, 139, 203

Packed columns 59, 177
Palladium 261, 267
Phase equilibria 161
Plasticization 222
Polyimide 222
Polyphosphazene 252
Polysulphone 215
Potassium carbonate 177
Pressure modelling 77, 115, 125
PSA 9, 115, 125, 151, 173, 235, 242

Scrubbing 111
Silicalite-1 67
Sulphur dioxide 111, 259

Temperature profiles 181
Thermal swing 21
Through-flux 49
Tiva Canyon 11
Transport 2

Vent gases 111
Zeolites 67, 210
